

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1 **Claim 1 (currently amended):** A foldable mobile
2 communication terminal comprising:
3 an upper case including a control processing section,
4 a display, a RF communication section, an I/O connector
5 section and a vibrator section of which corresponding
6 function blocks are mounted on a hard board; and
7 a lower case including a key operation section and a
8 battery of which corresponding function blocks are mounted
9 on a key board,
10 wherein the key board arranged and accommodated in the
11 lower case is a flexible board,
12 ~~wherein a battery terminal, a microphone, a key~~
13 ~~diaphragm, and a LED for keys are all mounted on portions~~
14 ~~of one surface of the flexible board and said portions are~~
15 ~~folded or turned down before storing the flexible board in~~
16 ~~the lower case, and~~
17 wherein a battery terminal, a microphone, a key
18 diaphragm, and a LED for keys are all mounted on said
19 folded or turned down portions of the flexible board.

1 **Claim 2 (previously presented):** A foldable mobile
2 communication terminal according to claim 1,
3 wherein the display arranged and accommodated in the
4 upper case comprises a liquid crystal display,
5 wherein a menu selecting section for selecting a menu
6 by navigating through a menu system displayed on the
7 display is disposed in the vicinity of a lower side of the
8 display.

1 **Claim 3 (previously presented):** A foldable mobile
2 communication terminal according to claim 1,
3 wherein the flexible board shares its use as a
4 connecting board for connecting the upper case and the
5 lower case.

Claim 4 (canceled)

1 **Claim 5 (previously presented):** A foldable mobile
2 communication terminal according to claim 1, wherein a
3 microphone section is mounted in an inclined state on a
4 lower side of the lower case at a position close to a
5 speaker's mouth so as to receive a sound from the speaker
6 directly while in use.

1 **Claim 6 (previously presented):** A foldable mobile
2 communication terminal according to claim 1, wherein a view
3 port is provided on the lower case whereby displayed
4 contents on the display can be seen in a folded state.

1 **Claim 7 (previously presented):** A foldable mobile
2 communication terminal according to claim 6, wherein the
3 view port is disposed between the microphone and the key
4 operation section.

1 **Claim 8 (original):** A foldable mobile communication
2 terminal according to claim 6 or claim 7, wherein a
3 transparent plate is mounted on the view port.

1 **Claim 9 (original):** A foldable mobile communication
2 terminal according to claim 8, wherein the transparent
3 plate is given a lens function.

1 **Claim 10 (previously presented):** A foldable
2 communication terminal according to claim 1, wherein a
3 portion of the upper case and the lower case in the
4 vicinity of a section being mechanically connected with
5 respect to each other is formed in a narrower configuration
6 than a remaining portion.

1 **Claim 11 (currently amended):** A foldable mobile
2 communication terminal comprising:

3 an upper case including a control processing section,
4 a display, and a RF communication section of which
5 corresponding function blocks are mounted on a hard board;
6 and

7 a lower case including a key operation section, a I/O
8 connector, and a vibrator and the battery of which
9 corresponding function blocks are mounted on a key board,
10 wherein a flexible board is used as the key board
11 arranged and accommodated in the lower case,

12 ~~wherein a battery terminal, a microphone, a key~~
13 ~~diaphragm, and a LED for keys are all mounted on portions~~
14 ~~of a same surface of the flexible board and are folded or~~
15 turned down before storing the flexible board in the lower
16 case, and

17 wherein a battery terminal, a microphone, a key
18 diaphragm, and a LED for keys are all mounted said folded
19 or turned down portions of the flexible board.

1 **Claim 12 (previously presented):** A foldable mobile
2 communication terminal according to claim 11,

3 wherein the flexible board shares its use as a
4 connecting board connecting the upper case and the lower
5 case.

Claim 13 (canceled)

1 **Claim 14 (previously presented):** A foldable mobile
2 communication terminal according to claim 11, wherein a
3 portion of the upper case and the lower case near a section
4 being mechanically connected with respect to each other
5 formed in a narrower configuration than a remaining
6 portion.

Claims 15-18 (canceled)
